#### YPSILANTI.

The Most Beautiful of Michigan Cities.

Her Advantages for Residence and Manufacturing Purposes.

Detroit westward. Its location was not a the quality of hardening and working to matter of arbitrary choice, not the design gether under the tread of horses and wag currence of circumstances. Nature seems stone. to have formed and adapted its site to the purposes of a clean, moral, flourishing inland city, to stand as an entrance to the first Charter was approved by the Terinterior of the State, while Detroit holds ritorial Governor of Michigan. Thus in the place of the great street door.

interior of the beautiful peninsula, De- habitants of Washtenaw County, to the troit and Malden were frontier posts of number of thirty, to celebrate the Fourth rival powers, who contended for the al- of July in his "Grove," the settlement liance and friendship of the powerful assumed civic honors. Towns grow faster tribes which inhabited the territory between now, but that shows a rapid growth for the great lakes. Toward these points the ante railroad days. Indian trails, from a wide extent of country, now forming the State of Michigan and neighboring States, converged, and, extensive trade in dry goods and groceries; where now stands Ypsilanti, they intersect- it also affords a market to a large extent of ed, or approached each other as nearly as country, for all the products of a highly the state of friendship among the tribes, cultivated and fertile soil. which held alliance respectively with France and England, would permit.

The ground must have been regarded as neutral territory, as, though there were evidently extensive burial grounds here, the many graves opened by early settlers all had the appearance of peaceful burial, and not the least breath of traditionary

battles has descended to us. No Indian trader, then, could fail to see that here was a favorable point for his business. Here the Indians, loaded with furs, could be met, in advance of the dealers in Malden and Detroit, and here, on their return, laden with gifts from their powerful friends, they could be again met, with the inducements which the traders knew so well how to use, to part with their wealth.

Here she trading firm of Godf. Jy, Pepin & LeChambre, drove a thriving business, while no individual white man had a claim bought by covering it with greenbacks.

In the year 1811, probably simply for Ypsilanti is also the seat of the the purpose of maintaining a monopoly of trade, or else of levying a revenue upon others who might wish to compete with them, this firm procured a grant of twentyfive hundred acres of land, including much of the present city, from the general government; President Madison giving the Of the city, all of which are in a prosperthose of civilization.

struck the crystal Huron, where it empties occasional worship. into Lake Erie, it should follow up that stream in search of the land that sent forth such waters. Thus it was that in 1823, the flat bottomed boat, propelled by poles, that the traders used in their fishing and trading excursions, brought up to "Godfrey's on the Pottowatomie trail" a party of hardy emigrants consisting of Major Benjamin Woodruff, Robert M. Stitt, John Thayer, and David Beverly. This arrival was to the future "Ypsilanti" what the arrival of the pilgrims at Plymouth Rock was to the settlement of the Colonies.

Late in the Autumn of the same year, a pioneer by the name of Bryan cut his way through from Detroit, occupying four days being the first man who reached the spot with a team—a yoke of oxen.

The settlement thus commenced was known as "Woodruff's Grove," from the fact that it was surrounded by a small but beautiful forest, while much of the adjacent country consisted of open sandy plains. Yet the foundation of a city did not seem to enter into the plan of the original settlers. They simply settled where experience taught them to expect good fortune, and awaited its coming. It was left for more enterprising men fully to appreciate and develope the advantages of the position. In 1825 some of the most far sighted citizens of Detroit, began to "look about them," to see what the peninsula was capable of. The "French claim," of Godfroy, Pepin & LeChambre, was purchased by Woodward, Stewart and Harwood, and a village was laid out, which, in honor of a partisan leader who distinguished himself in the Greek Revolution, then in progress, they called "Ypsi-

Having thus sketched the origin of the city, space will not allow us to dwell on the details of its progress. We shall proceed to survey it as it now stands.

covered a space over a mile in width, but make a note of this. is now confined to a narrow channel, flowing under the bluffs which must one day to some one who has not received one.

have been its banks. The current is rapid and in no place within the city limits is there any low or muddy ground that might be productive of miasma. The soil is generally a deep gravel, to the depth of 25 or 30 feet, resting upon clay, and the very purest of water for any use, is readily obtained by wells of moderate depth. In

this respect the city is unrivalled. In visiting the place nothing will sooner Ypsilanti, the first of those cities attract notice than the beauty and smooth which are threaded like pearls upon the ness of the streets. This is owing to their line of the Michigan Central Railroad, lies | being covered with gravel, of which large on the Huron River, thirty miles from deposits are found in the city, possessing of land speculators, nor the fortuitous con- ons, until it resembles a surface of solid

YPSILANTI MINERAL BATH HOUSE

#### THE NEW BATH HOUSE.

A Model of Elegance and Comfort.

An Enterprise Destined to Prove of Great Importance.

The illustration presented on this page accurately represents the front of the new bath house erected by the Ypsilanti Mineral Bath Company, on Huron street, just

was learned, many plans were formed to utilize it to the city's advantage, among them being the proposition of Messrs. George Moorman and Clark Cornwell to their names in connection with an enterbuild such an establishment providing the and the intersection of important lines of citizens should raise \$5,000 to aid in its construction. Promise of the money was rained and work was bygun on the mo ing of May 8th, 1883. Its construction has been pushed as rapidly as the weather would permit, and the house is now just ready for occupancy, being one of the finest edifices in the city.

The building in question is constructed after the most modern style of archiecture of brick and stone, has a plate glass front, and presents a handsome appearance. It is of an L. shape, has a frontpart represented by the lower part of the the lower part being used for the office dressing rooms. The basement will be used for barber shop and laundry, and the second story is divided into eight large and airy rooms for the accommodation of it off until now. My health is fully re guests who may wish to room in the building. In the rear of the two story part are located the bath rooms, 43 in number, all of which are fitted up in the best possible manner, with all the latest improvements. A portion of these bath rooms are fitted up for spring water, hot or cold, and the remainder for the water from the Ypsilanti Mineral Well. In the rear of the bath rooms are the engine, boiler and pump rooms. The entire building is heated by steam, and it is probable that it will be lit by electricity. No expense has been spared by Messrs. Moorman and Cornwell to make this the best establishment of the kind in the country. The plat of ground owned by this Company extends from Huron street to Huron river, there being a large body of land in the rear of the building. It is probable that the ground will be made into a park, giving an elegant place for a promenade and for all kinds of games, while the river offers a fine place

Messrs. Moorman and Cornwell have secured Mr. A. A. Elliot to manage the business of their establishment. This gentleman has had over eight years experience with mineral water treatment, during which time he has been very successful. The Company is now at work drilling another well, expecting to reach the water at a depth of about 800 feet.

The Ypsilanti Mineral Bath Company's building is centrally located, being only one block from the from the principal hotels of the city, making it very convenient for patients. Or, if they desire, board can be had immediately adjoining the building. Ample hotel and boarding accommodations can be depended upon. Additional hotel facilities are already being contemplated by the gentlemen of this

There is no question as to the curative learned physicians of the country. Cures one a veteran of the war of 1812.

have been effected of patients who have taken treatment from the celebrated Hot Springs, Arkansas, and other places. The fame of the Ypsilanti Mineral Water is growing and extended every day. It is now being sold in many of the large metropolitan cities, as far distant as the New England states, where the water sells readily for one dollar a gallon.

Time management of this institution is in the hands of two of our best business men. Mr. Moorman is one of our oldest and most reliable citizens, and one of the heaviest real estate owners in this section completed at an expense of over \$30,000. of the state. Mr. Cornwell is secretary of When the efficacy of the mineral water the Epsilanti Paper Company, an energetic and pushing business man. They are both well known in this section, stand high in the community, and a mere mention of prisq of this kind is enough to insure success and honorable and just treatment to rties concerned

e Ypsilanti Minerai Bath Company institution of which Ypsilanti may us be proud, and which is in every way leserving of the patronage and generous support of the people.

#### A BAD CASE OF SCIATIOA.

"Tot" Norton, a hotel man who is well and favorably known to the traveling public in Michigan, and who is now connected with the Occidental at Muskegon, in a purely private letter to W. H. Hawkins, proprietor of the Hawkins House of this city, through whose influence he first decided to try Ypsilanti Mineral Water, and it whose hotel he remained during his treatment, writes as follows:

Muskegon, Mich., Dec. 23, 1883, FRIEND WALTER:—I have been going to write you for some time, but have put ten years as at the present time, all thanks and praise to the wonderful water of you place. I never let a chance go by that I don't speak a good word for it and your good House. If you see Dr. Hall, you can tell him that I am hard at work every day and not an ache or pain about me, and that I will write him a good long letter

Thanking you for your kind treatment to me, I remain

## Yours truly. Tot Norton.

Mr. Norton was stopping at the Hawkins House, and was so bad from rheumatism and sciatica that it took him nearly five minutes to climb an easy flight of stairs. Business called him away before he was fully restored, but, as his letter shows, he continued to improve after stopping treatment.

The fact that the letter is not a solicited testimonial makes its value as a recommendation more apparent.

It costs large sums of money to get important measures through the British par liament. During the last ten years no less than £2,500,000 has been spent in promoting railway bills, and more than £800,000 in opposing them. Adding certain extra legal expenses, the cost of these bills has been only a little short of £4,000,000. In addition £250,000 has been spent upon gas companies and £380,000 upon water com-

It has just been announced, officially, that the total amount of fire insurance written in this country in 1882 was \$70,741, 000,000, that the average premium rate was 99 cents, and that the ratio of loss to this was 50 cents, and the important thing about it is that the premium rate was six cents above that of 1881, while the loss ratio was one per cent. lower.

The town of Lexington, Mo., has an "old powers of this mineral water, many cures men's club" with 24 members, to which having already been effected of cases no one is admitted under 70 years of age. which have baffled the skill of the most It was organized in 1868 by ten men, every

#### YPSILANTI'S PRIDE.

Her Educational Advantages.

THE SCHOOLS OF YPSILANTI.

We design, from month to month, to give an account of our schools, thereby informing non-resident readers of our educational facilities. In no place in Michigan are greater advantages offered to those desiring to educate their children.

Our school privileges may be briefly stated as follows:

1. The State Normal School.

2. The Conservatory of Music.

3. The Public Schools.

4. The Catholic Parochial School. 5. The Commercial School and Writing

Institute. We can only give in this number a brief account of the Normal School, and must reserve mention of the others till future issues. The School is composed of the Normal proper, and the Department of Observation and Practice—a regular Eight Grade School which is taught by

pupils from the Normal Department. The Normal School is, by the Constitution of the State, made a part of our educational system, and is placed under the control of the State Board of Education. Its sole aim is to qualify teachers to perform efficiently the various kinds of work required in the public schools. Hence the organization of the School in all of its departments has special reference to this result. The courses of study, the methods of instruction, and the practice teaching are so arranged as to give a thorough professional training.

Applicants for admission are examined in Reading, Spelling, Grammar, Geography and Arithmetic so far as to ascertain their fitness to enter upon a course of study in the Normal School.

Persons who have passed the entrance examinations are admitted to any advanced class by passing the necessary examinations, or, without examination, on presenting certificates of standing from the Superintendent or Principal of a High School, Graded School, or other institucepted in those branches required by law for the lowest grade legal license, namely: Orthography, Reading, Writing, Geography, Grammar, Arithmetic, U. S. History and Civil Government. The arrangements of the Normal School are such that special instruction is given each term

The Faculty consists of eighteen persons

as follows. \*Edwin Willits, M. A., Principal, Politi cal Economy, Civil Government, and School Law.

Austin George, M. A., Vice-Principal, Director of the School of Observation and Practice.

Julia A. King, Preceptress, History. Daniel Putnam, M. A. Principles of Teaching based on Mental and Moral

Philosophy. Frederic H. Pease, Vocal and Instru mental Music and Director of the Conser-

vatory of Music. Charles Fitz Roy Bellows, M. A., C. E. Mathematics

Lewis McLouth, M. A., Ph. D., Natural Joseph P. Vroman, M. A., Latin and

Greek Languages. August Lodeman, German and French

Languages. Helen Post, Critic in Grammar Grades

of School of Observation and Practice. Fanny E. Goffe, Drawing, Penmanship and Book-Keeping. Ann Janette Bignell, Instructor in

English.

Ency J. Coleman, Critic in Primary Grades of School of Observation and Practice. Lucy A. Osband, M. A., Biology and

Geology. George F. Key, Instructor in Mathematics William H. Brooks, Instructor in An-

cient Languages and English Branches. Rose V. Barton, Instructor in History and German. -, English Language and

Literature.

Pupils entering the School are offered the choice of five regular courses of study, as follows: Scientific, four years; Literary, four years; Ancient languages, four years; Modern languages, four years; English, three years. A special course with music, and several special courses made up of optional selections from the regular courses are also offered.

Pupils graduating from any course are entitled to legal life certificates of qualification to teach in any of the public schools of the State not under special law.

The School is in a very flourishing condition: the attendance thus far the present term is 539.

\*Mr. Willits has served three terms as Representative in Congress from Second District of Michigan.

A well equipped laboratory, the finest philosophical and chemical apparatus, an observatory with an excellent telescope and transit instrument, a choice library of six thousand volumes, a reading-room with the leading papers and periodicals, and the latest maps and charts,-all concur to give rare facilities in the various branches of

Each member of the Legislature of Michigan is authorized by the Board of Education to appoint two students from his district, who will be received, on the presentation of his certificate of appoint ment, free of charge. The certificate must be presented at the time of admission. Each appointment is good for one year only. Every student, not holding an appointment from a member of the State Legislature, is required to pay five dollars in advance as a tuition fee for each term. Students from other States pay five dollars each term.

Board and furnished rooms can be obtained in private families at rates varying from \$3.00 to \$4.00 per week. Many, by "clubbing," reduce the expenses of board to \$2.00 to \$2.25 per week. Others board themselves and thus bring their expenses within \$2.00 per week.

In a subsequent issue we shall publish cuts of the different buildings.

#### RAPID PRINTING.

It will doubtless be interesting, not only o home but to foreign readers, to learn how THE YPSILANTIAN is printed. The forms are put in type and made ready at this office, but we have not been able to secure press accommodations nearer than Detroit, our edition being so large that it would keep an average press busy a month, while under our present plan, we secure our papers in five hours from the time the forms reach Detroit. The work is done by the Detroit Evening News, upon two fast presses, each faster than any other in Michigan.

Of them the Evening News says: In the fall of 1880 the circulation of the Evening News had attained such propor-

tions that the old four-cylinder Hoe press, which was regarded as a marvel of rapid-ity when it was introduced in 1873, became School, Graded School, or other institu-tion of learning approved by the Faculty. four-cylinder was even then the fastest Certificates of standing are not acmands for the Evening News were still faster, and it had to make room for more perfect machinery. A new press-a Scott web—was then put in, with an ordinary capacity of 24,000 complete papers per hour, which has been run ever since Sep-

tember, 1880, without a break, to its full capacity every afternoon. ning News more than kept pace with the apacity of that wonderful and beautiful machine. Steadily as it rattled off its 24,000 perfected copies of the paper every hour, ne vociferous and simultaneous clamors of newsboys, agents, carriers and newsmen ecame at last necessary to supplement its powers. The necessity was anticipated some months ago. A new press, similar to that of 1880, was ordered, was built and was put into a new press room last week, and was set at work for the first time Mon-

day to assist its elder brother in printing the Evening News. The old press had a capacity equal to three times that of the Post and Tribune, or the Free Press, which are the next fast est presses in this State. The two presses gether will print 48,000 complete papers per hour—equal to twice the united capacities of all the other presses used in Detroit for printing English dailies. To take the papers as fast as they come from these two machines the agents, newsboys, carriers and others will have to handle 800 papers per minute. The 5 o'c'rock edi-ion of 26,000, which has heretofore required over an hour in printing, will here-

The Evening News is the first and only paper in Michigan, and one of less than a dozen in the country, which requires two presses to print its edition. With these improved facilities to supply the increasing emand for its copies the News now sets forth on another advance in circulation. confident that the time will come when these two great presses now running will have to be assisted by a third, to print a circulation of 75,000 to 100,000 papers a The public are invited to visit the press

### The Opsilantian.

M. T. WOODRUFF. MONTHLY EDITION-JANUARY, 1884.

#### THE MONTHLY EDITION.

This, the monthly edition of THE YPSILANTIAN, is the outgrowth of a demand, existing and felt for a long time, for a channel through which the many advantages of our beautiful city could be made known to the outside world. It is not a "boom" sheet, nor a spasmodic effort to infuse galvanic life into a sleepy or dead town. It is not dependent upon bonuses or contributions from the citizens, but is a legitimate business enterprise, through which, while advancing, in a greater degree than he has yet been able, the interests of the finest of Michigan's municipalities, the publisher yet will reap a reasonable profit for his work.

THE YPSILANTIAN was commenced as a weekly in January, 1880. With January, 1884, the efforts which have through the former source proved of great value to the place, its influence is supplemented by the establishment of a special monthly edition, to be issued regularly for circulations among outsiders, to whom mere local news Items would prove a waste of space.

Our plan of operation can more certainly be learned from observation than otherwise. Suffice it that we shall use every honorable means to the end in view.

To our readers we wish to say that every statement in this paper regarding Ypsilanti and her advantages shall be the truthnothing more. The name we have built up we shall not sacrifice, and where the exact fact can not be given, it shall be our aim to tell less than is true-never overdrawing or exaggerating. We may be led into error at times, but are confident of our ability to guard against material misstatement.

The reader of this paper, should he find it of any interest or value, is invited to become a regular subscriber, the subscription rate being very low. The expense of postal notes and postage (five cents) may he take from the amount.

#### To General Advertisers.

The Publisher of THE YPSILANTIAN takes pleasure in announcing the establishment of the monthly edition of that paper, which starts off with a GUARAN-TEED circulation of 50,000 copies per month. This month the first edition is 60,000 copies.

A limited number of advertisements will be accepted and are respectfully so- the city was not a safe place. licited. The rates are 50 cents per nonpareil line (twelve lines to an inch) per month; but for trial orders the following discounts are offered buging January

For a single month, 40 per cent. off. For two months, 50 per cent. off. For three months, 60 per cent. off.

The paper is a six-column folio, and arrangements have been made for its careful and general distribution throughout the OHEMICAL United States and Canada, its make-up being such that it will be carefully preserved and thoroughly read by the best class of our citizens.

Advertisers desiring extra copies for their own use will be supplied at nominal rates, without additional cost for their advertisement.

We are permitted to refer to the Ypsilanti Paper Co., to the Ypsilanti Mineral Bath Co., and to any bank or business house in this city, whose card appears in these columns.

Favors intended for the February number must reach us by the 20th of this month, to receive attention. MARCUS T. WOODRUFF,

Publisher. Ypsilanti, Mich.

#### To Our Newspaper Friends.

Sample copies of this paper are sent to many journals throughout the country, in the hope that our fellow publishers, as wellas others, may find some benefit by perus-

Upon receipt of marked copy of your paper containing notice of THE YPSILAN-TIAN, we will place it upon our mailing list for a year. An exchange is unnecessary, but at any time items of particular interest to us are inserted, marked copies will be thankfully received.

With a Happy New Year to the fraternity, THE YPSILANTIAN presents its compliments and bids each one Good Day.

We feel proud of the advertisers who have favored us this month. We doubt if any publication in America can show a list of higher standing; and we feel sure that our determination to guard our columns against occupancy by irresponsible and disreputable firms will benefit not only ourself but our readers and advertisers as well.

Our facilities are such that no matter how large an edition we are compelled to print, we can accommodate every patron without delay.

Reader, if this paper is of no interest to you, do not destroy it. Hand it to some one to whom you think it possibly may

#### HEALING WATERS.

The Mineral Springs of the Ypsilanti Paper Company.

Remarkable Curative Properties. Diseases in which it is Beneficial.

From the Chicago Times, August, 1883. In the fall of 1882, in accordance with a plan that for some time had been in contemplation, the Ypsilanti Paper Company -represented in this city by Messrs. F. P. Elliott & Co., Nos. 208 and 210 Randolph street—the heaviest manufacturing concern in the pleasant little city of Ypsilanti, Mich., began the drilling of a deep well, the object being, primarily, to secure,

result could be obtained. The work was

wells are bored. The object was never attained, but one of greater importance was, for, at a depth the appearance-including the terrible odor—of the celebrated waters of two or the others, there not being so much common salt in it as to prevent its being palatable. The well was sunken to a depth of 740 feet, when work was suspended, the hole tubed, and the discovery made public.

Mayor—H. R. Scovill, Clerk—P. W. Carpenter, Treasurer—D. C. Batchelder, Attorney—Howard Stephenson, Supervisors—Lee Yost, M. L. Shutts, Justices of the Peace—D. C. Griffen, M. L. Immediately the excitement became great. The belief that here was a miracu-Marshal- H. Goldsmith; also Chief of Polous remedy for every ailment, spread, and ice,

G., horse-shoeing, machine and boiler repairing; manufacturers of cultivators, harrows, 3-horse whiffletrees. River street near railroad.

Probably the first man to use this water MISHER, D. J. general book-binder and sta- for cancer was Mr. John J. Kimball, an acquaintance from boyhood of the HOUGH, GEO. W., opposite new Sanitarium.

Also newsdealer. Everything in his line writer, and who is employed in the mill guide by all interested in such matters.

The Weekly Times gives in a contraction of the mill guide by all interested in such matters. near which the well was bored, whose of his fellow-workmen inspired him with the idea to use it.

The cancer with which Kimball was afflicted was about as large as a silver 5-cent the West are interested. piece, dark and malignant-looking, and DAVIS, FRED. S., pure drugs, tollet articles, perfumes, etc. Prescriptions a specialty. was situated upon the nose, near the point. The disease was hereditary, had been pronounced cancer by eminent surgeons, some of whom advised that it be not molested, KNAPP, R. E., physician and surgeon, druggist, opp. Sanitarium, Huron St. Diseases of women and children a specialty. lest it be excited to greater activity. But the sore caused him much anxiety, and he MOON, JOHN S., east side druggist. Presfretted over it a great deal. "More than once," said he, on one occasion, "have I been compelled to wrap my hands in cloths to prevent involuntary injury by scratching my face in my sleep."

Kimball used the water moderately as a DEVOE, P. H., south side Congress. Jay Worden's old stand. tonic, and bathed his nosed regularly with it. To his joy, the peculiar crawling sensations in his face ceased, the sore gave WALLACE & CLARKE, Union Block, Congress street. signs of improvement, and healed. February 14, exactly two months from the time of discovery of the water, not the CADY, C. H., corner Congress and Washington streets. least sign of the former noticeable blem-DAVIS & CO., the east side grocers, north ish could be seen. Nor can it be noticed to this day, no symptom being felt at any KING & SON, corner Congress and Huron streets. time. He and his comrades are convinced NEAT, GEO. A., variety store, and dealer in railroad ties. Cross street that the cure is permanent.

Without a doubt the most remarkable case that has been known in the use of the water is that of Mr. Austin Guild, an old and well-known citizen of Ypsilanti, who NEAT, THOS., Huron street; two doors for years had been suffering with a cancerous affection of the face, the attempted cure of which had cost him a goodly sum. A chat with this sufferer reveals a wonderful influence the water had on a complication DRURY & TAYLOR, hardware, glass, stoves, etc. Manufacturers in sheet iron, tin and copper, 25 Congress. of other diseases which had rendered him unfit for business or labor. Mr. G., induced by reading of Kimball's case in a local paper, THE YPSILANTIAN, commenced using the water, and his case shows a like improvement, although the cure is not yet quite complete, the disease being YPSILANTI MINERAL WATER more aggravated and deep seated. So great has been the effect that this summer the first season in years—Mr. G. has been steadily at work at his trade, painting, a severe task for a man of his age, even if in perfect health.

SCHAFFER, G. F., manufacturer and dealer; south side Congress, opp. Union Block. A third case is that of a lady in the same city, whose disease, being internal, rendered it far less endurable, and caused her Madam Rhode's Hair Restorer. It makes city, whose disease, being internal, renat times from its loathesomeness to wish grey hair return to its natural color, cleans BARNUM & EARL, south side Congress st., for death. From being offensive to herself and friends, the water has cleansed her DODGE, S. H., fine goods and diamonds a specialty, 12 Congress street. system and given her relief from suffering head. No drugs used in this preparation, that had been looked for only by the end-LUCKING, G. W., fresh and salt meats, ing of life.

A lady in Toledo has found relief in a No. 406 Tremont St., Boston, Mass. case of cancer, and, as the result, the ship-

ment of water to that city is of frequent occurrence.

Besides these cases of cancer, an analysis of the water by Prof. A. B. Prescott, of Michigan University, has shown it to be excelled for its proper uses by none other of its kind in the world, and physicians of Ypsilanti and neighboring towns use it freely in various classes of chronic complaints, especially rheumatism, kidney and liver complaints, and all blood and skin

The microscope has detected blood corpuscles on steel after an exposure of two years in the woods.

## THE TIMES.-- 1884

DAILY AND WEEKLY.

THE GREATEST NEWSPAPER.

At the opening of the presidential year entrusted to an experienced force from the attention of intelligent readers is in-TIMES.

In every department of news THE Times aims to excel. While giving all the important news of the Old World and the Eastern portion of America which can be value was discovered. This liquid had all found in the best papers of New York and other seaboard cities, THETIMES gives the current events of the West and Norththree other Michigan cities, lacking, how- west, with a completeness which makes ever, the extremely bitter, briny taste of it the favorite local paper of readers throughout half a dozen states.

In Washington THE TIMES maintains a corps of able and vigilant correspondents, who report promptly by telegraph not only all events of national interest originating or in progress at the capital, but also matters of particular interest to the people of the Great West.

Special correspondents are also stationed States and Canada, and THE TIMES is also represented by specials in over eight hundred cities and towns of the West, East, and South, furnishing, with the facilities of the Associated Press, the most comprehensive news-gathering machinery employed by any newspaper in the world.

Times during the coming year that its readers shall be kept fully informed of all matters connected with the great Presidential struggle upon which the country is now about to enter, and with the no less important canvass for the new congress to be chosen next November, as also with the local political contests, especially in the Western States, which are of no less interest to the people than the incidents of National politics.

The Financial and Commercial department of THE TIMES include full and accurate reports of movements affecting the interests of capitalists and business men that occur in Europe or America. Its Chicago, New York, and other markets will be found a trustworthy record and

THE WEEKLY TIMES gives in a condensed but sufficiently ample form all the hour, together with a comprehensive view of all the markets in which the people of

## Ypsilanti Mineral Bath Co.

#### YPSILANTI MINERAL SPRING BATHS

news of each week, made up to the latest BUCKLIN BLOCK, opposite the Post Office, YPSILANTI, MICH.

With over 16 years experience in the treotment of Acute and Chronic Diseases, and a large number already treated with the FAMOUS MINERAL WATER, we find these baths most effective in the cure of

SCIATIC AND MUSCULAR RHEUMATISM, PARALYSIS, CATARRH OF THE HEAD AND STOMACH, INDIGESTION WITH TORPID LIVER, DYSPEPSIA, SLEEPLESSNESS, NET-YOUS PROSTRATION, JAUNDICE AND BILIARY DISORDERS, ALL DISEASES OF KIDNEYS, INCLUDING BRIGHT'S DISEASE, SKIN DISEASES & ERUPTIONS, CONSTIPATION, THE ROOT OF MANY DISFASES.

These Mineral Baths, adapted to each case, are most important in the treatment of Prolapsus Uteri, Uterine Inflammations and Congestions, and all diseases peculiar to women. They relieve the sufferer from the distressing nervous prostration and weakness which accompanies such trouble.

Inflamed Eyes with Congested Lids, Skin Diseases, Psoriasis, Eczema, Salt Rheum, etc., will yield to the power of these Baths and the internal use of the Mineral Water. To remove Mercury, Miasma, Ague, Chills and Congestion, we recommend the Hot Mineral Bath, with the friction and manipulation given here.

The Mineral Bath equalizes the circulation and regulates the heart's action. It purifies the blood by opening the pores and removing impurities, and re-vitalizes and tones the muscular and nervous systems. It is thus both preventive and curative of most forms of disease. See in another column a few of our thousands of testimonials.

#### JUNIPER'S WIFE.

[Edward Irenæus Stevenson in Good Cheer.] "I say it again, I think that when a man is as old as you and as well-to-do he ought to have a wife," repeated young Parson Frank

Ebenezer dropped the axe. "Look-a-here, Master Frank. Don't St. Paul give a kind of gineral order that men folks are better single? Hain't I had the hull superintenderin' 'f this big farm for your ma while you've been off to your commentaries and Hebrew? Come now! Be reasonable. Besides, the Kitterys hain't never been marryers—hain't troubled none of your cloth

"There's your brother Juniper-" interrupted the young man pertinaciously.

"Yes—there's Juniper, an' a pretty time he had tyin' himself up. Humph! Not but that he done well enough—very well, in fact, when he'd accomplished it."

The young man's ears itched at once. "Tell me about that, Ebenezer," he said art-fully. "I never heard how Juniper came to

Ebenezer began his narrative with a pre-tense at chopping while it proceeded. From this he took to balancing the ax on its head; from that to sitting down opposite the rever-end Frank and carving a letter of the alpha-

bet absent mindedly on a bit of pine.

"You see, Master Frank, Juniper was not of the same disposition as me and brother Dan. He was the best lookin' of the three: straight an' supple, an' with a sparkle in his eye that he hain't lost yet. The girls to our village-it was when we was all livin' at the homestead, with father and mother—all liked him; an' twas' recipperated. First, Juniper was goin' to singin'-school with Katey Parker, an' then 'twas all over the place that he an' Liberty Ann Myers was engaged. Next, 'twas Gineral Jo Bank's eldest daughter—I disremember her name—an before we'd fa'rly began plagu'in him on the subject o' Gineral Jo's daughter, he was attentive to Mimy Bunce. Brother Dan an' sister Lize an' me finally paid no heed to the town gossip, but quietly went our ways an' let June go his'n. We was satisfied that he was merely nibblin' here and experimentin' there; didn't mean to settle down on anybody yet

"Now down to the lower end of the village Aved Widow Amanda Gayler an' her three daughters. The widow was a very smart, capable woman, an' her three daughterswell, three handsomer, cleverer, livelier gals never grew. Everybody liked 'em. Before long, Juniper was a frequent caller there. He rode out with Anna, the eldest; or he'd come to church with Jenny, the second; or he'd be heard of over to a dance at the Corners with Ruth, the youngest. The three sisters were wonderful fond of each other—an' fond of a little quiet mischief together, too. I don't think they kept any secrets from one another. It didn't occur to me, Master Frank, for some time that Brother Juniper really wanted to marry one o' these girls—an' couldn't make up his mind which he wanted. But that was ist the state he was in. You see he'd grown ap with 'em all three an' been so intimate with em, even while he'd been keeping up his attentions to half a-dozen other girls, that no one of 'em had apparently ever made a deeper impression on him than the other. They was all alike so friendly an' so kind an' so full of fun. When he came to settle down goin' to their house more than elsewhere, he was better pleased with 'em than ever; but whether 'twas Anna or Jenny or Ruth? that was the p'int poor June was a-wrestling with internally, for weeks an' weeks. That fall his uncle, Jared Kittery, died an' left him the Stone farm; an' brother said that he'd really ought to pick out a wife and settle

'One night I found it out. He let me understand, very sheepishly, just how he felt.

'You see, Brother Ebenezer,' he said, 'I am
terribly perplexed, an' suppose I should find
after I was married that I'd made a mis-

"Well, June," says I, 'I don't see that make a mistake. A man who don't know his own mind had better draw lots for a partner.' I spoke rather contemptuous, I dare

"Brother Juniper jumped up from his chair by the table with a sort of angry sparkle in his eye; but he gave a short laugh. 'Not a bad notion, Eben,' said he. I sat by the table, occasionally sayin' a word here an' there with reference to the three girls; how Anna was so well educated an' Jenny such a firstrate housekeeper an' Ruth such a pretty, sensible sort of a young female—all more to tease June a little than anything else. All at once June jumped up. He had three pieces of paper in his hand. Blest if he hadn't written on one of them 'Anna,' on another Jane,' an' 'Ruth' on the last! 'There,' says be, shakin' 'em together in my hat, 'much obliged to you for your good advice, Brother I'm goin' to draw for one of those Whichever name I get—she's the one I'm goin' to ask to be Mrs. Juniper Kittery before Sabberday.

"I laughed, takin' the hull matter as a foolish joke. 'All right,' says I, 'I'll hold the hat.' So I did. June shut his eyes and jammed in his fist. 'Read it out!' says I to him. 'Anna,' he answers, rather slowly an' as if not so astonishin'ly happyfied. He tossed away the paper an' said no more. Thinks me, 'June has got some sort of an in'nard preference for one o' them sisters, after all; and he don't know it, but it isn't

"I never thought seriously of that caper we two had cut that evenin', until Saturday night, when just as I was closin' up the house, last one to go to bed, in steps June.
"'I've done it, Eben,' says he, with a

sing'lar sober face.

'June!' says I; 'not Anna-d.' "'Yes,' he answers Tve Anna-d; not Jenney-d nor Ruth-d. Don't you recollect last Monday evenin'? That settled it. I've abided by that piece o' paper. She said she'd have me. It's done; an' I'm glad.'

"'Well,' said I, 'I give you joy, June; though I must say your way o' clearin' up your doubts aint to my taste for common usage. Anna's a fine girl.'

"'But that ain't all, brother Eben,' he went on. 'Anna's got an amazin' queer no-tion o' gettin' married. 'Tseems she's been a readin' some novels or stories and so forth; an' I guess they've made her fanciful. She thinks that it'd be grand fun to surprise our folks along with ma an' the other two girls, by us two bein' married on the sly, the night before Thanksgivin'—an' then comin' home and tellin' 'em. I don't see any fun in that—not a bit! I think it looks rather foolish. But Anna-I declare I don't know what's got into her!—she will hold to it! The long and short of it is that-' 'You've promised to do it,' says I.

"'Yes,' he answers. 'I suppose it'll make a stir; but that can't be helped. I've promised. None of her folks nor ours must know anything about our engagement yet. On Thanksgivin' evenin' I'm to call for Anna with the sleigh. I want you to come along too, Eben. We'll go straight down to Battle Hill, to Parson Latham's, an' have the knot tied. Then we'll come back an' let it out to the widow an' Jenny and Ruth. After that the hull crowd of us will pile down here, an' have the pleasure of seein' father an' mother an' everbody here open their eyes. That's

Anna's idea. As I said, I don't specially admire it, but, still, I give in to it.'

"Thinks me, Master Frank, there's some game here that clever girl's up to!
Mebbe—an' mebbe not. But I told Juniper go with him on Thanksgivin't. 'You two can sit in the back seat and I'll drive,' I said. June laughed. 'See here, June,' I says a moment later just as we went up the stairs, 'I hope that you'll never let Anna know how it was that you picked her

out from her sisters.' "June blushed an' stammered something like 'Cert'inly not-it would have come out this way in any case'—an' went into his room. 'H'm,' I thought, 'I'm not so sure of that. I must give you a good talk to-morrow.'
"When I tried to talk, however, June
wouldn't hear to me. 'He knew what he was

doing'—so he persisted. Anna was the girl who would make him just the wife he wanted; an' the Stone farm was all ready for 'em to move in right away.' He had 'rather taken a fancy, he remembered, to Ruth at one

a fancy, he remembered, to Ruth at one time, but that hadn't amounted to anything.' I said no more, but I kept up quite a-thinkin'.

"The night before Thanksgivin' of that year was as clear as a bell. There was three feet o' snow all over the country. At 7 o'clock June an' I drove to the Gaylers' door. Almost before I'd got the horses still, a figure all tightly wrapped up slipped out the gate. Poor Anna!—She seemed terrible nervous as June helped her into the seat by him.

"Oh June' I heard her say. I almost wish "'Oh, June,' I heard her say, 'I almost wish

I'd never thought o' this silly plan.'
"June did almost all the talkin' while we spun down the street and out on the Battle Hill turnpike. Anna sat with his arm half round her, and seemin' for the first time to realize that she was takin' an important step

"I hardly looked at 'em after Anna was "I hardly looked at 'em after Anna was in her seat by June. The horses was in a complete gale. I had to give them my hull attention. It required whip an' reins an' everything else to make 'em behave. The parsonage at Battle Hill is only two-miles-an' a-half from our village. We fairly flew over the road. Then, just before we passed the big gates that led to Squire Loftus's place, Dollar gave a lunge. That set Prince a-goin'. Before I could help it, they wheeled sharp, overset the sleigh, an' they wheeled sharp, overset the sleigh, an' ran themselves up to their shoulders in a snowbank. There they stood. We, meanwhile, were pickin' ourselves up as best we could.
"In the name of goodness!—' I heard

Juniper shout in a voice that frightened me half to death. I scrambled up and looked at the other two. It was bright moonlight. There stood Brother Juniper. In front of us was the person who'd come with us in the

was the person who'd come with us in the sleigh—Ruth Gayler.

"Before either of us could say a word she burst right out a-cryin'. Then followed the queeriest, the most mixed-up and ginerally surprisin', explanation of what had took place an' how it had come about, that ever I expect to hear in all my mortal life. Most of the time I univer just mortal life. Most of the time Juniper just stood there, pale and bewildered. I put the best part of the bad questions there was to ask, holding the horses' heads. It must have looked a curious picture.

"Our hired help and Lucretia Tabb, who'd "Our hired help and Lucretta Tabb, who'd been dressmakin' at the Gaylers' for a couple o' weeks, off an' on, was great friends. That night when Brother June had drawn that lot—we'd ought both to have been ashamed of ourselves for such foolishness—our Almira'd overheard the hull affair. She told Lucretia Tabb. And what does Lucretia do but tell Anna; an' Anna told her sisters.

"At first Anna was prefty well put out at

"At first, Anna was pretty well put out at Brother June. Then when she an' Jenny an Ruth talked it over, they couldn't but laugh and call it all a real joke on June.

Then they put their heads together directly, to find out a way to punish June for coming to one of them with was why Anna'd contrived the stolen wed-

When they first planned it out, Ruth (who had plenty of mischief in her) was perfectly willin' to undertake the part arranged for her—she to meet brother June, instead of Anna, in the dark. That'd be easy; the girls had all much of a height, figger and voice. When we'd reached Parson Latham's steps, she was to pull off her veils and make a low bow to poor June an' say, 'Mr. Juniper Kittery, I've brought my sister's compliments an' she hopes that the next time you ask a girl to marry you, you'll know whether you love her or whether any of her sisters mightn't do just as well—especially, hopes that you won't toss up her.' Then she was to hold out the identical piece of paper with 'Anna' written on it. (Almira pounced on it, while she was sweeping, the day after 'twas written.) An', last of all, Ruth calculated to say, 'Come, June; a joke's a joke. We don't bear no malice, not even sister Ann. You mustn't.

"But, you see, Master Frank, Ruth had liked Brother June more than she thought, an' all week the idea of actin' such a part even to oblige Anna and have some sport galled her the worse. She couldn't bear to think of it. She begged Anna and Jenny to let her off an' Jenny to play the part of Anna herself. But, no; they insisted on her keepin' to her promise. So, between her bein' so mortified and so afraid o' hurtin' brother's feelin's too keenly, she was pretty well onnerved when Anna and Jenny pushed her out of the door to run to the sleigh. Then, too, there was me. June hadn't happened to say a word about calculatin' on my' goin to Parson Latham's with 'em. Ruth felt worse than ever.

Just drive me back home.'

"'Oh, June,' she said, with her long golden hair all fallin' down on her shoulders an' her voice choked with cryin', 'will you, will you forgive me? Please do, dear June, I'm so ashamed of myself. Whatever shall I do, to show you how sorry I am?

"June didn't answer for a minute. His eyes were flashin' an' his teeth set. I could see that Anna Gayler was out of his books for-ever. But what I couldn't see was goin' on, jest in that identical space o' time. Brother June was findin' out his own heart at last? He looked at Ruth an' remembered what good true got \$1,400,000 cash and me to back him up.

Mrs. Van K.—But the future—posterity friends him an' her'd been during all their pranks and capers. He was discoverin' what a beautiful face she had (for she was the handsomest of the three), an' how she felt at havin' helped in mortifyin' him. She was a good, true girl, was go?

Ruth, under all her mischief. "'Ruth,' says brother, coming up closer to her an' holding out his hand, 'don't say no more; please don't. It's I who ought to beg pardon of Anna, an' all of you. I do it—'specially of you, Ruth. I know now that I haven't ever cared half so much for Anna as -as I have-for somebody else. What a blind fool a man can be, if he only tries! Ruth, I came down this road to-night to get married to a woman I thought I loved. Please don't be angry, nor think me a weathercock as I've seemed to be. I want to go back an' tell Anna and your folks an' mine an' all the village that I've married the

girl I love. There's the difference." "Ruth Gayler started back from Brother June. I could see how white her face had grown in the clear light. 'June she says sharply-'I-I don't understand.' As she spoke she tried to draw away her hand, and June went on quickly, 'But

I do an' I must make you see it.' "I quietly turned away, under a pretense

o' the horses bein' restless. I was dumb founded. June and she stood there, with me a little way off. They talked an' talked. I would only catch June's voice now an then; not her's at all. I knew now that she loved brother; an' that, whatever he said, she'd have to fight against herself, or June would carry any point he chose—the han'some, persuadin', shamefaced fellow.

"All at once he turned round and called out with a laugh that rang over the fields, 'Hurrah, Brother Eben? Pve wen my wife!' 'An' he came over to the sleigh, half leadin' half liftin' Ruth Gayler in his arms, with her a-laughin' and tryin' to make him keep still and goodness knows what all. I j'ined in with all the fun, an' we had a real frolic. But it ended in our goin' straight on to Parson Latham's door an' gettin' out and Brother Juniper an' Ruth Gayler, blushin' and tremblin', bein' married then an' there be-fore my eyes, an' my drivin' home to the

Gaylers' in my best style.

"You can imagine how the village was stirred up when next day part o' the story got out. Only part; for all the widew's folks kept Anna's share in it still as a mouse; an' so did June an' me. Everybody was wantin' to know 'why in the world them two young young folks'd been married in that queer, sudden way. Nobody outside of us two families ever found out. As for Anna, she was just as delighted as any woman could be. She'd suspected how Ruth felt and June too, all along an' had hoped that after this joke was all over, brother might think some day seriously o' Ruth. But, of course she'd no notion of so sudden a wind-up of the thing, in just the way she wished. As for Ruth-why, she made June the best an' lovin'es wife in the world an' he's been as happy with her as the day is long, at the farm.'

#### GENERAL JUBAL EARLY.

A Couple of Anecdotes of the Famous Confederate Cavalry Leader.

[Washington Cor. New York Sun.] He is drawn up into a hard knot with rheumatism, and has a face like a hickorynut. His voice is pitched on a very high key, and he is a compound of shrewdness and sarcasm in equal parts. He was strongly opposed to secession at the beginning of the war, al-though he fought valiantly when fighting was inevitable. In the Virginia convention of 1861 he attacked the conduct of South Carolina bitterly. After the war had actually begun he had in his brigade a South Carolina regiment. It was observed that old Jubal was always sure to put that regiment in the most ticklish place when the brigade was under fire. During one of the bales around Richmond Early's brigade was ordered to the front, and, as usual, Early made the South Carolina fellows head the column, squeaking out at the top of his voice as he rode up to them: "Yes, I'll send you to the front and I'll keep you there, too. You got us into this fix, and, d—n you, you've

During the war he went to church only once, and his experience then was not such as to encourage him to go again. It was in the winter of 1864, when the southern states were agitating the expediency of a conscription. Gen. Early was one of the most ardent adve-cates of it. He talked conscription in season and out of season, and wanted to conscript everything. One Sunday morning, to the amazement of his staff, he proposed that they should ride over to a neighboring church and hear the sermon. The officers were nearly paralyzed at the proposition, but, of course, consented promptly. The country congregation was astonished at seeing Gen. Early and

trades, all grades, all professions, all of every kind, before you? I repeat," with a whack

on the desk, "what would you do?"
"Do?" bawled Jubal, suddenly aroused from his nap, "I'd conscript every — one on at the office of The Chicago Times.

A roar went up from the congregation, and Jubal made a bee line for the door

[New York Truth.]
"What's the matter, Slocum?" asked one
Brooklyn E. D., young man of another, who wore a bicycle cap, and looked as though he ought to be in B. E. D.

"I was going across a vacant lot last night after I left my summer girl's house, in Bushwick, when a big beast of a dog chased me." "Catch you?"

"Ya-as, rather." "Why didn't you shoot him?" "Well, you see I had no gun, and besides I'd been reading a story that's going the rounds of the papers now about the Hon. Phil Hoyne, of Chicago, wherein he says that he frightens dogs by taking his hat off. His theory is that the dog reflects, and thinks the human apparition is tearing himself to

"Well, did you try the honorable gentle-

"Umph, umph, I guess he thought I wasn't tearing myself to pieces fast enough, and he took a holt to help. The (his language was such) brute has my new Fedora hat yet, unless he's through with it."

OR NEAREST AGENCY.

YPSILANTI, MICH.

Read the following UNSOLICITED TESTIMONIALS from those who have used the Water.

421 Washington Boulevard, Chicago, Dec. 15, 1883. To the Ypsilanti Mineral Spring Water Co., 100 Randolph street, Chicago:

To the Ypsilanti Mineral Spring Water Co., 100 Randolph street, Chicago:
Gentlemen—I think I would be wanting in my duty to mankind if I did not make acknowledgement to you (for private or public use, as you may see ift) of the benefit I have received and the load that has been lifted off my mind by the use of your mineral water.

As a gaeat many of Chicago's prominent business men know (I having been brought in contract with them in my labor for this paper, The Chicago Times), my health failed me about two years ago ago. I consulted some of the best physicians in the city, who pronounced my case catarrh of the throat, nervous exhaustion, and general debility, brought on through overwork. One particular physician said it must end in consumption. Chiers advised me to try change of climate. I took their advice. I went to California, but, while the climate and scenery were beautiful, Iwas not helped. Tried English doctors with the result as our own. Was adviced to try the south of France; spent the winter in Nice, no good resulting therefrom. Was adviced to try the south of France; spent the winter in Nice, no good resulting therefrom. Was adviced to try the south of the throat,—Ill he aristocratic patients, the Kaiser of Germany included, resorting thither for said complaints. I went there and statid two weeks over the time specifi.

Mr. Cornwell—Dear Sir: I have in two different places one is as a sa as of several years standing—and entire the toty in the different places. One is the toty, and graph for the throat,—all the water, and persuaded her to try it, telling her how to take it, not having much and static and statisfaction at the proving since I came away, and still improving since I came away, and still improving since I came away, and was the proving since I came away, and the proving since I came away, and it in a rapid way of receivery, one of her limbs being almost the proving since I came away. I make the proving since I came away, and the proving since I came away, and the proving since I came away his entire staff march solemnly into church and take their seats in the front pews. As soon as old Jubal settled himself he laid his head back and relapsed into a comfortable nep. The clergyman took for his subject the testimony of the truths of Christianity. After preaching an hour or two he askel:

"What would you say, my brethren, if the dead of all times and nations and ages should pass in solemn review before you? What would be your feelings at seeing this vast and countless multitude from the grave? What would you do with this army of men of all trades, all grades, all hither for said complaints. I went there and staid two weeks over the time specifi

TESTIMONIAL No. 13. LINDEN, Mich., Nov. 21, 1883.

Dr. Hall, Ypsilanti, Mich:
I think you stated a fact in the beginning when you thought two months' baths mg when you thought two months' baths and treatment with you by the Ypsilanti Mineral Water would cure a bad case of chronic erysipelas and salt rheum, from which I had suffered for more than three years, and taken 100 baths in other places without relief and wing more than I am without relief, enduring more than able to tell. But the disease has left me now after taking 40 of your baths. (Refer to Dr. Hall, specifying No. 13.)

#### TESTIMONIAL No. 14.

completely cured. As it is, after my return home I gained rapidly, and am now able to attend to my business, though I rheumatism, and at times it troubles me considerably, especially in my feet, and only there. You succeeded in driving it entirely out of my knees, so that I am and ankles to that extent as to unable me and ankles to that extent as to unable me and ankles to that extent as to unable me to walk a greater part of the time for the past two years, swelling and breaking out at times. The Ypsilanti Mineral Water was recommend the baths and treatment of Dr. Hall, or of any other intelligent physician, to all those afflicted with chronic or inflammatory rheumatism. Kind regards to all. (The name can be furnished of this party by writing to Dr. Hall, Ypsilanti, Mich., giving No. 14 of letter for him to refer to.)

and ankles to that extent as to unable me to walk a greater part of the time for the past two years, swelling and breaking out at times. The Ypsilanti Mineral Water was recommended to me as a sure cure for blood poisoning. I had but little faith, but concluded I would try it, and, to my surprise, found it to be in my case all that was recommended. Persons wishing to learn the truth of this statement, address MRS. R. LINTON, Cottage City, Mass.

TESTIMONIAL No. 21. Providence, Nov. 26, 1883.

MR. CORNWELL Dear Sir: I have introduced your water in two different places.

One is a constant of the control of
